1 / battleground
1 presence
4 dominance
6 control

1

Presence
Control of at least one country

Dominance
Control of more battlegrounds *and* more total countries than your opponent, *including* at least one non-battleground

Control
Control of all battlegrounds *plus* more total countries than your opponent

Placing influence
Restricted to countries neighboring countries where your side has markers at the beginning of the round.
Placing into a country under enemy control costs 2 Ops / 1 Influence.

Coup attempts
Target must have enemy influence.
Spend all Ops from one card. Add the Ops value to a roll, against 2x stability. If successful, reduce enemy influence (and if it goes to 0, add your own influence) by the difference.
Always advance your Military Operations track by the Ops value.
A coup attempt in a battleground country always degrades **DEFCON** by 1.

Re-alignment roll
Costs 1 Ops
Each player makes a modified roll:
+1 if they have more influence
+1 each neighbor they control (including the superpower)
The loser removes influence equal to the difference between the rolls.

Twilight Struggle The Cold War 1945-1989
